

SUMMARY

As a final year Business Studies student specializing in Data Analytics, I possess a strong foundation in Python, SQL, and Power BI, complemented by a keen analytical mindset and adept problem-solving skills. My objective is to leverage these competencies within a progressive technology consulting firm, where I can contribute to innovative solutions, optimize data-driven strategies, and collaborate on transformative projects that align with cutting-edge industry trends. I am motivated to continuously expand my technical knowledge and consulting expertise, aspiring to drive meaningful impact and deliver exceptional value to clients.

SKILLS PROFILE:

Excellent communication skills developed through sales internship at Johnson and Johnson, emphasising relationship building and effective client interaction.

Team player through participation in local Basketball and Tennis teams, with a strong focus on effective communication.

Proficient problem-solving skills honed in previous part-time roles, with a keen eye for detail and a creative approach.

Strong organisational and time management skills, balancing academic responsibilities, club involvement, art, and social life
